User Story 1
A. Identification and classification
Test Case 3
System: Edufit
Phase: registration page check
Severity: 1

B. Instructions

1. Input new username, email, and password for registration page

C. Expected Result:
1. Should take you to homepage
D. Actual Result:

Username:	newuser
Email:	newuser@email.edu
Password:	········

A. Identification and classification
Test Case 4
System: Edufit
Phase: user should be able to type in
Severity: 3

B. Instructions

1. Input incorrect email

C. Expected Result:
1. Throws error

D. Actual Result:

Invalid email

newuser@

Type '/' to search from your saved info ✕

User Story 3
A. Identification and classification
Test Case 5
System: Edufit
Phase: user profile update check
Severity: 2

B. Instructions
1. Input updated information for the user

C. Expected Result:
1. Updates information

D. Actual Result:
Test fails. Profile doesn't get updated on the backend

A. Identification and classification
Test Case 6
System: Edufit
Phase: user profile update check
Severity: 2

B. Instructions
1. Input updated information for the user include username and password

C. Expected Result:
1. Updates information

D. Actual Result:

Email

john@doe.com

Password

New password

Confirm password

New password

Test fails. Profile doesn't get updated on the backend

User Story 4:

A. Identification and classification
Test Case 7
System: Edufit
Phase: visibility update check
Severity: 1

B. Instructions
1. Change the visibility and try submitting it

C. Expected Result:
1. Updates user visibility

D. Actual Result:
VISIDIIITY

> Public

Required
Fails. Doesn't update data on the backend

A. Identification and classification
Test Case 8
Phase: visibility update check - server
Severity: 1

B. Instructions
1. Make a post request to the server to change user visibility with json object
{ user_id, token, newVisibility}

C. Expected Result:
1. Updates user visibility

D. Actual Result:
The backend updates the visibility field for the user.

User Story 5:

A. Identification and classification
Test Case 9
System: Edufit
Phase: meal logger
Severity: 1

B. Instructions
1. Input macros into the meal logger
2. Press on the add food button

C. Expected Result:
1. Meal is logged and displayed in the frontend

D. Actual Result:

Meal Logger

test food	1000	1234	1234
1234	1234	Breakfast ⌄	Add Food

Meals

Edit | Remove | test food – Calories: 1000 – Protein: 1234g – Fats: 1234g – Carbs: 1234g – Quantity: 1234oz. – Meal Type: Breakfast

Test case passed.

A. Identification and classification
Test Case 10
System: Edufit
Phase: meal logger
Severity: 1

B. Instructions
1. Click on the delete button to delete meal

C. Expected Result:
1. Meal is deleted and it stops displaying

D. Actual Result:

Meal Logger

User Story 6:

A. Identification and classification
Test Case 11
System: Edufit
Phase: BMI tracker
Severity: 1

B. Instructions
1. Enter information in the BMI field.
2. Press calculate BMI

C. Expected Result:
1. Displays the correct BMI

D. Actual Result:

BMI Calculator

5.10

69

165

Calculate BMI

Your BMI: 6.97

BMI Categories:
Underweight = <18.5
Normal weight = 18.5–24.9
Overweight = 25–29.9
Obesity = BMI of 30 or greater

Test failed. Incorrect BMI outputted.

A. Identification and classification
Test Case 12
System: Edufit
Phase: BMI tracker
Severity: 1

B. Instructions
1. Enter information in the BMR form.
2. Press calculate calculate BMR

C. Expected Result:
1. Displays the correct BMR (basal metabolic rate)
D. Actual Result:

Metabolic Rate Calculator

21

Male

5.10

69

165

Calculate BMR

Your BMR: 2544.25 calories/day
To lose 2 lbs/week: 1544.25 calories/day
To lose 1 lb/week: 2044.25 calories/day
To maintain weight: 2544.25 calories/day
To gain 1 lb/week: 3044.25 calories/day
To gain 2 lbs/week: 3544.25 calories/day

According to the result above, it looks about correct. So test case is passed.

User Story 7:

A. Identification and classification
Test Case 13
System: Edufit
Phase: meal logger
Severity: 1

B. Instructions
1. Add multiple meals through the meal logger form

2. Press add meal

C. Expected Result:
    1.   Displays a list of meals 2.

D. Actual Result:

Meals

Edit   Remove   test food – Calories: 1000 – Protein: 1234g – Fats: 1234g – Carbs: 1234g – Quantity: 1234oz. – Meal Type:
Breakfast
